

Height adjustable industrial workstations

Focus on packing tables

Improve productivity with ergonomic adjustability

Anyone concerned with LEAN, process flow and automation should seriously consider the benefits offered by electric height adjustment in the packing department.

Quick and easy adjustment of packing tables and the various means of bringing the package to and from the table will often result in an immediate improvement of both logistics and productivity – but

this is only the beginning. On a long-term basis the the ergonomic benefits include improved safety and lower absentee rates.

LINAK DESKLINE® electric actuator systems for packing tables and equipment are built to handle heavy loads using less energy than other motion solutions. Operation is easy, quiet and smooth. Best of all LINAK linear actuators provide many years of maintenance-free service even in rough working environments.

LINAK DESKLINE® benefits to improve productivity:

- Quick and easy adjustment in case of frequent changes in package size and/or multiple shifts
- Optimal conditions for long work periods at the packing table

Safety, reliability and high capacity

LINAK DESKLINE® provides complete modular solutions

LINAK DESKLINE® can provide you with a modular system complete with lifting columns, programmable control box and control for easy integration into your packing table and packing equipment design. We focus on safety, high lifting capacity and robust reliable quality, and every system undergoes a 100% function test before it leaves the factory.

CBD4 programmable control box is capable of controlling up to 4 columns in parallel operation. Settings such as preferred stroke length and speed are easily programmed using a simple software tool.

DL1A ultra stable column using ball guidance. High load capacity. Designed for easy integration into any packing tables.

DL6 general purpose lifting column. High stroke length. Compact design for easy integration into any packing tables.

DL2 robust lifting column with very high load capacity and high bending moment. Inline design for easy installation. Very reliable and maintenance free even in rough environment and work situations.
